Agriculture 4 Health:
Impacts of agricultural development on human health and nutrition in Ethiopia
with Henok Kurabachew Mulat
Hawassa University College of Agriculture

Tuesday, August 18, 2015
5:00-6:00 p.m.

Room 1010
Medical Sciences Center
1300 University Ave.

Henok Kurabachew Mulat, associate professor of plant pathology and director of the School of Nutrition, Food Science, and Technology at Hawassa University, promotes multidisciplinary academic and research programs to improve nutrition in Ethiopia. He is working with UW-Madison on an orange-fleshed sweet potato nutrition and health project in collaboration with the International Potato Center. He is also interested in the impacts of climate change on agricultural productivity and nutrition in his country. Mulat’s visit to Madison is funded by a Global Health Institute Visiting Scholars grant.
